

TELFORD TOWN PARK **Sensory Garden**

CHelsea GARDENS

Welcome to Chelsea Gardens and in particular to the Sensory Garden, created and managed by the Friends of Telford Town Park and opened in 2014. The 24m by 12m Sensory Garden was designed by the Friends' Drop in Gardening Group together with professional landscape architect Thereesa Rham to replace the old rose garden.

If you are interested in becoming involved or are in a group looking to take on a small space contact the Telford Town Park Visitor Centre on 01952 382 340 or email telfordtownpark@telford.gov.uk. To join the Friends' group contact -----

Chelsea Gardens

Chelsea Gardens was originally designed and built to be exhibited at the Chelsea Flower Show DATE? and comprises a series of linked garden 'rooms' each with their own individual character.

The main funding for this project came from the Town Park and the 'Parks for People' Lottery Fund. Donations of money and equipment were gratefully received from local companies which included plants, bricks and topsoil.

Once all of the mechanical work and the hard landscaping had been completed, members of the Friends of Telford Town Park began the task of preparing the site to realise the original plan.

One feature of the sensory garden are the raised beds which make the plants accessible to wheel chair users. There are sculptures and water features to enjoy too.
